

# WELCOME TO NEW LAS VEGAS - "EXPERT VARIANT"

This variant is the reworking of the expert variant in Welcome to... and allow the experienced Architects to add control over the picking of the Casino cards, while increasing even further the interaction between players. It is a card-drafting variant of the base game.

## Set Up

- ★ Create a single stack with all the Casino cards, effect side up.
- ★ Pick 3 Project cards and put them next to the Casino cards stack.
- ★ Each Architect takes a city sheet, a score sheet and a pen.
- ★ A random Architect is designated as the croupier.
- ★ The croupier deals 3 cards from the Casino stack to each Architect.

## Game turn

- ★ Each Architect must select 2 of the 3 cards he has in his hands: one for its number and another one for its effect (a card cannot be used for both its number and its effect).
- ★ Each Architect places them in front of him, then uses them (compulsory opening of a casino + optional effect) before discarding them in a common discard pile next to the Casino cards stack.
- ★ Each Architect then gives his third (unused) card to the neighbor on his right, effect side up.
- ★ Finally, the croupier deals 2 casino cards to each Architect, starting with himself, in order to begin a new turn.
- ★ If there are no cards left in the Casino stack, the croupier shuffles the discard pile and create a new Casino cards stack.
- ★ The other rules of the basic version apply normally.
